

Product Datasheet

GenieFluor 488 Anti-Mouse CD183/CXCR3 Antibody [CXCR3-173] Catalogue Code: AGEL0432

Antibody Data

Applications:FCMReactivity:Mouse	Product SKU:	AGEL0432	Clone:	CXCR3-173
Reactivity: Mouse	Applications:	FCM		
	Reactivity:	Mouse		

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Uniprot ID: Background:	 C-X-C chemokine receptor type 3;Cxcr3;CXC-R3;CXCR-3;Interferon-inducible protein 10 receptor;IP-10 receptor;CD183/CXCR3; 088410 CD183/CXCR3, also known as CXCR3, is a member of the C-X-C chemokine family, characterized by a pair of cysteine residues separated by a single amino acid. CXCR3 is a 38 kD seven pass transmembrane receptor coupled to G-protein. It mediates Ca2+ mobilization and chemotaxis in response to C-X-C chemokines, such as IP10 (CXCL10), MIG (CXCL9), I-TAC (CXCL11) and PF4 (CXCL4). CXCR3 is expressed primarily on activiated T lymphocytes, NK cells, and some epithelial cells and endothelial cells. It is not expressed on B cells, monocytes or granulocytes. 		
Form:	Liquid	488 Excitation and Emission Spectra	
Conjugation:	Genie Fluor488	100	
Size:	50 Tests, 100 Tests, 200 Tests	80 - S	
Host Species:	Armenian Hamster	(%) 00	
Isotype:	Armenian Hamster IgG	E 40 20 0 0 0 0 0 0 0 0 0 0 0 0 0	

Isotype Control:

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
