

Product Datasheet **GenieFluor 647 Anti-Mouse CD54 Antibody [YN1/1.7.4]** Catalogue Code: AGEL0719

Antibody Data

Product SKU:	AGEL0719	Clone:	YN1/1.7.4
Applications:	FCM		
Reactivity:	Mouse		

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names:	Intercellular adhesion molecule 1;Icam1;MALA-2;MyD10;CD54;Icam-1;		
Uniprot ID:	P13597		
Background:	CD54 is a 90 kD immunoglobulin superfamily member also known as ICAM-1 and Ly-47. It is expressed on activated endothelial cells, high endothelial venules (HEV), T and B cells, monocytes/ macrophages, granulocytes, and dendritic cells. CD54 is an important intracellular adhesion molecule that participates in T cell-T cell, T cell-B cell, and T cell-target cell interactions via binding of LFA-1 (CD11a/CD18) and Mac-1 (CD11b/CD18). CD54 has also been shown to be involved in lymphocyte trafficking, making it an important molecule in many immune reactions and inflammation. CD54 is also a receptor for rhinovirus. The YN1/1.7.4 antibody has been reported to block binding of mouse CD54 to LFA-1 and Mac-1, inhibit cell-cell adhesion, and function in antigen presentation to T cells and leukocyte migration to inflammatory tissues.		
Form:	Liquid	647 Excitation and Emission Spectra	
Conjugation:	Genie Fluor647	100 -	
Size:	25µg, 100µg	80 - S	
Host Species:	Rat	(%) 00 00 00 00 00 00 00 00 00 00 00 00 00	
Isotype:	Rat IgG2b, к		
		550 400 450 500 550 600 650 700 750 600 650 Wavelength (nm)	
Isotype Control:	Genie Fluor 647 Rat IgG2b, κ Isotype Control[LTF-2] [Product AGEL0719]		
Otomo wa Dufferi			

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- RecommendedEach lot of this antibody is quality control tested by flow cytometric analysis. Please check
your vial before the experiment. Since applications vary, the appropriate dilutions must be
determined for individual use. We suggest each investigator should titrate the reagent to
obtain optimal results [The recommended concentration is 0.1-1 μg/106 cells in 100 μL
volume].
