

Product Datasheet

PerCP/Cyanine5.5 Anti-Mouse CD40 Antibody [FGK4.5/FGK45]

Catalogue Code: AGEL0788

Antibody Data

Product SKU: AGEL0788 Clone: FGK4.5/FGK45

Applications: FCM

Reactivity: Mouse

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Tumor necrosis factor receptor superfamily member 5;Cd40;B-cell surface antigen

CD40;Bp50;CD40L receptor;CD40;Tnfrsf5;

Uniprot ID: P27512

Background: CD40 is a 48 kD type I transmembrane glycoprotein also known as Bp50. It is a member

of the tumor necrosis factor receptor (TNFR) superfamily and is expressed on B cells, basal epithelial cells, macrophages, follicular dendritic cells, endothelial cells, and a subset of CD34+ hematopoietic progenitors. CD40 regulates B cell development/maturation, Ig isotype switching and, in combination with other signals such as IL-4, protects B cells from surface Ig-induced apoptosis and promotes proliferation. Interaction of CD40 with its ligand CD154 (gp39), which is expressed on activated T cells, is important in costimulation and

immune regulation.

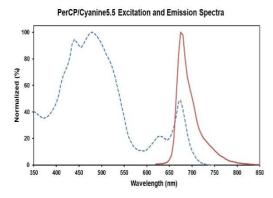

Form: Liquid

Conjugation: PerCP/Cyanine 5.5

Size: 25µg, 100µg

Host Species: Rat

Isotype: Rat IgG2a, κ

Ex:440;480;675 nm; Em:675 nm

Isotype Control: PerCP/Cyanine5.5 Rat IgG2a, κ Isotype Control[2A3] [Product AGEL0788]

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

Stability & Storage: Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to

light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial

contents. This product is guaranteed up to one year from purchase.

Recommended Usage:

Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the reagent to obtain optimal results [The recommended concentration is 0.1-1 μ g/106 cells in 100 μ L

volume].
