

Product Datasheet **PE/Cyanine5 Anti-Mouse CD122 Antibody [5H4]** Catalogue Code: AGEL0794

Antibody Data

Product SKU:	AGEL0794	Clone:	5H4	
Applications:	FCM			
Reactivity:	Mouse			

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Uniprot ID:	Interleukin-2 receptor subunit beta;Il2rb;IL-2 receptor subunit beta; IL-2R subunit beta;IL- 2RB;High affinity IL-2 receptor subunit beta;p70-75;CD122; P16297		
Background:	CD122 is a 70-75 kD IL-2 receptor β chain also known as IL-2R β , which is also shared by the IL-15 receptor. It is constitutively expressed by NK cells and at lower levels by T cells, B cells, monocytes, and macrophages. The IL-2R β chain can combine with either the common γ subunit (γ c, CD132) alone or with the γ c subunit and the IL-2R α subunit (CD25) to generate intermediate or high affinity IL-2 receptor complexes, respectively. CD122 expression levels can be upregulated by activation. The 5H4 antibody does not block IL-2 binding to the IL-2 receptor. CD122 is expressed on murine, but not human, CD8+ Tregs involved in the maintenance of T cell homeostasis.		
Form:	Liquid	PE/Cyanine5 Excitation and Emission Spectra	
Conjugation:	PE/Cyanine 5	100	
Size:	50 Tests, 100 Tests, 200 Tests	80 © 2 60	
Host Species:	Rat	(%) 60 Pozire Low	
Isotype:	Rat IgG2a, к	20 0 350 400 450 500 550 600 650 700 750 800 Wavelength (nm)	
		Ex:495;565;655 nm; Em:670 nm	
Isotype Control:	PE/Cyanine5 Rat IgG2a, κ Isotype Control[2A3] [Product AGEL0794]		

Isotype Control: PE/Cyanine5 Rat IgG2a, K Isotype Control[2A3] [Product AGEL0794]

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
