

Product Datasheet **PE/Cyanine7 Anti-Human CD69 Antibody** [FN50] Catalogue Code: AGEL1691

Antibody Data

Product SKU:	AGEL1691	Clone:	FN50
Applications:	FCM		
Reactivity:	Human		

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names:	Early activation antigen CD69;Activation inducer molecule;AIM;EA1;MLR-3;		
Uniprot ID:	Q07108		
Background:	CD69 is a 27-33 kD type II transmembrane protein also known as activation inducer molecule (AIM), very early activation antigen (VEA), and MLR3. It is a member of the C-type lectin family, expressed as a disulfide-linked homodimer. Other members of this receptor family include NKG2, NKR-P1 CD94, and Ly49. CD69 is transiently expressed on activated leukocytes including T cells, thymocytes, B cells, NK cells, neutrophils, and eosinophils. CD69 is constitutively expressed by a subset of medullary mature thymocytes, platelets, mantle B cells, and certain CD4+ T cells in germinal centers of normal lymph nodes. CD69 is involved in early events of lymphocyte, monocyte, and platelet activation, and has a functional role in redirected lysis mediated by activated NK cells.		
Form:	Liquid	PE/Cyanine7 Excitation and Emission Spectra	
Conjugation:	PE/Cyanine 7	100 -	
Size:	20 Tests, 100 Tests, 200 Tests		
Host Species:	Mouse	40	
Isotype:	Mouse IgG1, κ	20 0 350 400 450 500 550 600 650 700 750 800 850 Wavelength (nm)	
		Ex:495;565;755 nm; Em:775 nm	
Isotype Control:	PE/Cyanine7 Mouse IgG1, κ Isotype Control[MOPC-21] [Product AGEL1691]		

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
