

Product Datasheet **PE Anti-Human CD197/CCR7 Antibody [G043H7]** Catalogue Code: AGEL1803

Antibody Data

Product SKU:	AGEL1803	Clone:	G043H7	
Applications:	FCM			
Reactivity:	Human			
2				

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names:	CMKBR7; EBI1; EVI1;CCR-7;CDv	197.	
Uniprot ID:			
Background:	P32248 CCR7, also known as CD197, is a chemokine receptor that binds CCL19 and CCL21. CCR7 and its ligands link innate and adaptive immunity by affecting interactions between T cells and dendritic cells and their downstream effect. Naïve T cells enter the lymph node through high endothelial venules, which express CCL21. Dendritic cells and macrophages enter the lymph node through afferent lymphatics. The encounter of T cells and dendritic cells in the T cell zone is CCR7-dependent. In addition, during immunological surveillance, B cells recirculate between B-cell-rich compartments (follicles or B cell zones) in secondary lymphoid organs, surveying for antigen. After antigen binding, B cells move to the boundary of B and T zones to interact with T-helper cells; this B cell migration is directed by CCR7 and its ligands. CCR7-positive cancer cell expression has been associated with lymph node metastasis.		
Form:	Liquid	PE Excitation and Emission Spectra	
Conjugation:	PE	100 - 80 -	
Size:	20 Tests, 100 Tests, 200 Tests		
Host Species:	Mouse	Normalized 8	
Isotype:	Mouse IgG2a, к	20 0 350 400 450 500 550 600 650 700 Wavelength (nm)	
		Ex:495;565 nm; Em:575 nm	
Isotype Control:	PE Mouse IgG2a, κ Isotype Control[C1.18.4] [Product AGEL1803]		
Storage Buffer:	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.		

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
