

Product Datasheet **PE/Cyanine7 Anti-Human CD197/CCR7 Antibody [G043H7]** Catalogue Code: AGEL1806

## Antibody Data

Product SKU:	AGEL1806	Clone:	G043H7
Applications:	FCM		
Reactivity:	Human		

## **Important Note:**

Centrifuge before opening to ensure complete recovery of vial contents.

## **Product Information:**

Alternate Names:	CMKBR7; EBI1; EVI1;CCR-7;CDw197;		
Uniprot ID:	P32248		
Background:	CCR7, also known as CD197, is a chemokine receptor that binds CCL19 and CCL21. CCR7 and its ligands link innate and adaptive immunity by affecting interactions between T cells and dendritic cells and their downstream effect. Naïve T cells enter the lymph node through high endothelial venules, which express CCL21. Dendritic cells and macrophages enter the lymph node through afferent lymphatics. The encounter of T cells and dendritic cells in the T cell zone is CCR7-dependent. In addition, during immunological surveillance, B cells recirculate between B-cell-rich compartments (follicles or B cell zones) in secondary lymphoid organs, surveying for antigen. After antigen binding, B cells move to the boundary of B and T zones to interact with T-helper cells; this B cell migration is directed by CCR7 and its ligands. CCR7-positive cancer cell expression has been associated with lymph node metastasis.		
Form:	Liquid	PE/Cyanine7 Excitation and Emission Spectra	
Conjugation:	PE/Cyanine 7	100	
Size:	20 Tests, 100 Tests, 200 Tests	S 50 -	
Host Species:	Mouse	60 - 60 - 60 - 60 - 60 - 60 - 60 - 60 -	
Isotype:	Mouse IgG2a, κ	Ex:495;565;755 nm; Em:775 nm	

Isotype Control: PE/Cyanine7 Mouse IgG2a, κ Isotype Control[C1.18.4] [Product AGEL1806]

**Storage Buffer:** Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

**Shipping:** Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5  $\mu$ L of antibody per test (million cells in 100  $\mu$ L staining volume or per 100  $\mu$ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
