

Product Datasheet

PerCP/Cyanine5.5 Anti-Human CD274/PD-L1 Antibody [29E.2A3] Catalogue Code: AGEL2263

Antibody Data

Applications:FCMReactivity:Human	Product SKU:	AGEL2263	Clone:	29E.2A3	
Reactivity: Human	Applications:	FCM			
	Reactivity:	Human			

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

Alternate Names: Uniprot ID: Background:	 B7-H1; PD-L1;Programmed cell death ligand 1;B7 homolog 1;B7-H; B7H1; PDL1; PDCD1L1; PDCD1LG1; Q9NZQ7 CD274, also known as PD-L1 and B7-H1, is type I transmembrane glycoprotein that serves as a ligand for CD279 (PD-1). This interaction is believed to regulate the balance between the stimulatory and inhibitory signals needed for responses to microbes and maintenance of self-tolerance. CD274 is involved in the costimulation of T cell proliferation and IL-10 and IFN-γ production in an IL-2-dependent and CD279-independent manner. Conflicting data has shown that CD274 can inhibit T cell proliferation and cytokine production, and alternatively, enhance T cell activation. Other studies suggest that CD274 may signal bidirectionally, raising interesting implications for its expression in a wide variety of cell 		
Form:	Liquid	n-presenting cells, and nonhematopoietic cells.	
Conjugation:	PerCP/Cyanine 5.5		
Size:	20 Tests, 100 Tests, 200 Tests	80	
Host Species:	Mouse	(%) pozitemucov 40	
Isotype:	Mouse IgG2b, к	20 0 350 400 450 500 550 600 650 700 750 800 850 Wavelength (nm)	
		Ex:440;480;675 nm; Em:675 nm	
Isotype Control:	PerCP/Cyanine5.5 Mouse IgG2b, κ Isotype Control[MPC-11] [Product AGEL2263]		

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
