

Product Datasheet **GenieFluor Violet 450 Anti-Human CD69 Antibody [FN50]** Catalogue Code: AGEL2736

Antibody Data

| Product SKU: | AGEL2736 | Clone: | FN50 |
|---------------|----------|--------|------|
| Applications: | FCM | | |
| Reactivity: | Human | | |

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

| Alternate Names: | Early activation ontigon CD60: Activ | votion inducer molecule: AIM:EA1:MLP 2: | |
|------------------|---|--|--|
| | Early activation antigen CD69;Activation inducer molecule;AIM;EA1;MLR-3; | | |
| Uniprot ID: | Q07108 | | |
| Background: | CD69 is a 27-33 kD type II transmembrane protein also known as activation inducer molecule (AIM), very early activation antigen (VEA), and MLR3. It is a member of the C-type lectin family, expressed as a disulfide-linked homodimer. Other members of this receptor family include NKG2, NKR-P1 CD94, and Ly49. CD69 is transiently expressed on activated leukocytes including T cells, thymocytes, B cells, NK cells, neutrophils, and eosinophils. CD69 is constitutively expressed by a subset of medullary mature thymocytes, platelets, mantle B cells, and certain CD4+ T cells in germinal centers of normal lymph nodes. CD69 is involved in early events of lymphocyte, monocyte, and platelet activation, and has a functional role in redirected lysis mediated by activated NK cells. | | |
| Form: | Liquid | 450 Excitation and Emission Spectra | |
| Conjugation: | Genie FluorViolet 450 | | |

Storage Buffer: Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant.

Shipping: Biological ice pack at 4°C

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
