

Product Datasheet

GenieFluor Red 780 Anti-Human CD197/CCR7 Antibody [G043H7] Catalogue Code: AGEL3063

Antibody Data

| Product SKU: | AGEL3063 | Clone: | G043H7 |
|---------------|----------|--------|--------|
| Applications: | FCM | | |
| Reactivity: | Human | | |

Important Note:

Centrifuge before opening to ensure complete recovery of vial contents.

Product Information:

| Alternate Names: | CMKBR7; EBI1; EVI1;CCR-7;CDw | w197; | |
|------------------|---|---|--|
| Uniprot ID: | P32248 | | |
| Background: | CCR7, also known as CD197, is a chemokine receptor that binds CCL19 and CCL21. CCR7 and its ligands link innate and adaptive immunity by affecting interactions between T cells and dendritic cells and their downstream effect. Naïve T cells enter the lymph node through high endothelial venules, which express CCL21. Dendritic cells and macrophages enter the lymph node through afferent lymphatics. The encounter of T cells and dendritic cells in the T cell zone is CCR7-dependent. In addition, during immunological surveillance, B cells recirculate between B-cell-rich compartments (follicles or B cell zones) in secondary lymphoid organs, surveying for antigen. After antigen binding, B cells move to the boundary of B and T zones to interact with T-helper cells; this B cell migration is directed by CCR7 and its ligands. CCR7-positive cancer cell expression has been associated with lymph node metastasis. | | |
| Form: | Liquid | 780 Excitation and Emission Spectra | |
| Conjugation: | Genie FluorRed 780 | 100 | |
| Size: | 20 Tests, 100 Tests, 200 Tests | 80 - | |
| Host Species: | Mouse | (%) 60 60 40 | |
| Isotype: | Mouse IgG2a, κ | E 40 20 0 350 400 450 500 550 600 650 700 750 800 850 Wavelength (nm) | |
| Isotype Control: | Genie Fluor Red 780 Mouse IgG2a, κ Isotype Control[C1.18.4] [Product AGEL3063] | | |
| Storage Buffer: | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. | | |
| Shipping: | Biological ice pack at 4°C | | |

- **Stability & Storage:** Keep as concentrated solution. Store at 2~8°C and protected from prolonged exposure to light. Do not freeze. Centrifuge before opening to ensure complete recovery of vial contents. This product is guaranteed up to one year from purchase.
- **Recommended** Usage: Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μ L of antibody per test (million cells in 100 μ L staining volume or per 100 μ L of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.
