Alternate Names: Uniprot ID: Background:	Tacstd1;EpCAM;Ep-CAM;Megp314;EGP314; Q99JW5 EpCAM (CD326) mediates calcium-independent homophilic cell to cell adhesion. It may also function as a growth factor receptor. It is thought to be involved in maintaining cells in position during proliferation. Expression of EpCAM seems to correlate inversely with the level of E-cadherin (CD324). EpCAM is considered important in tumor biology.

- RecommendedEach lot of this antibody is quality control tested by flow cytometric analysis. Please check<br/>your vial before the experiment. Since applications vary, the appropriate dilutions must be<br/>determined for individual use. We suggest each investigator should titrate the reagent to<br/>obtain optimal results [The recommended concentration is 0.1-1 μg/106 cells in 100 μL<br/>volume].
