

TNFRSF1A Rabbit Polyclonal Antibody

CAB0033

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

Calculated MW:

24kDa/25kDa/38kDa/50kDa

Applications:

IF

Reactivity:

Human

Antibody Information

Recommended dilutions:

IF 1:50 - 1:200

Source:

Rabbit

Isotype:

IgG

Purification:

Affinity purification

Protein Background

This gene encodes a member of the TNF receptor superfamily of proteins. The encoded receptor is found in membrane-bound and soluble forms that interact with membrane-bound and soluble forms, respectively, of its ligand, tumor necrosis factor alpha. Binding of membrane-bound tumor necrosis factor alpha to the membrane-bound receptor induces receptor trimerization and activation, which plays a role in cell survival, apoptosis, and inflammation. Proteolytic processing of the encoded receptor results in release of the soluble form of the receptor, which can interact with free tumor necrosis factor alpha to inhibit inflammation. Mutations in this gene underlie tumor necrosis factor receptor-associated periodic syndrome (TRAPS), characterized by fever, abdominal pain and other features. Mutations in this gene may also be associated with multiple sclerosis in human patients.

Immunogen information

Gene ID:

7132

Uniprot

P19438

Synonyms:

TNFRSF1A; CD120a; FPF; TBP1; TNF-R; TNF-R-I; TNF-R55; TNFAR;
TNFR1; TNFR55; TNFR60; p55; p55-R; p60

Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 241-455 of human TNFRSF1A (NP_001056.1).

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Product Images

Immunofluorescence analysis of HeLa cells using TNFRSF1A antibody (CAB0033). Blue: DAPI for nuclear staining.
