LOX Rabbit Monoclonal Antibody

CAB11504

roduct Information	Protein Background
Size:	This gene encodes a member of the lysyl oxidase family of proteins. Alternative splicing results
20uL, 50uL, 100uL, 200uL	in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate a regulatory propeptide and the mature enzyme. The
Observed MW:	copper-dependent amine oxidase activity of this enzyme functions in the crosslinking of collagens and elastin, while the propeptide may play a role in tumor suppression. In addition,
56KDa	defects in this gene have been linked with predisposition to thoracic aortic aneurysms and dissections. [provided by RefSeq, Jul 2016]
