IGFBP1 Rabbit Monoclonal Antibody

Product Information

Product SKU: CAB11672 **Gene ID**: 3484 **Size**: 20uL, 100uL

Clone No: ARC0671 Host Species: Rabbit Reactivity: Human, Mouse

Additional Information

Observed MW: 30kDa Conjugate: Unconjugated

Calculated MW: 28kDa Isotype: IgG

Immunogen Information

Background: This gene is a member of the insulin-like growth factor binding protein (IGFBP) family and encodes a

protein with an IGFBP N-terminal domain and a thyroglobulin type-I domain. The encoded protein, mainly expressed in the liver, circulates in the plasma and binds both insulin-like growth factors (IGFs) I and II, prolonging their half-lives and altering their interaction with cell surface receptors. This protein

is important in cell migration and metabolism. Low levels of this protein may be associated with impaired

glucose tolerance, vascular disease and hypertension in human patients.

Recommended Dilution: WB,1:500 - 1:1000

Synonyms: AFBP; IBP1; PP12; IGF-BP25; hIGFBP-1; IGFBP1

Purifcation Method: Affinity purification

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 160-259 of human IGFBP1

(P08833).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,0.05% BSA,50%

glycerol,pH7.3.
