## DUSP3 Rabbit Polyclonal Antibody

## CAB12068

roduct Information	Protein Background
Size:	The protein encoded by this gene is a member of the dual specificity protein phosphatase
20uL, 50uL, 100uL, 200uL	subfamily. These phosphatases inactivate their target kinases by dephosphorylating both the phosphoserine/threonine and phosphotyrosine residues. They negatively regulate members of
Observed MW:	the mitogen-activated protein (MAP) kinase superfamily (MAPK/ERK, SAPK/JNK, p38), which are associated with cellular proliferation and differentiation. Different members of the family of
20kDa	dual specificity phosphatases show distinct substrate specificities for various MAP kinases, different tissue distribution and subcellular localization, and different modes of inducibility of
Calculated MW:	their expression by extracellular stimuli. This gene maps in a region that contains the BRCA1
16kDa/20kDa	locus which confers susceptibility to breast and ovarian cancer. Although DUSP3 is expressed in both breast and ovarian tissues, mutation screening in breast cancer pedigrees and in
Applications:	sporadic tumors was negative, leading to the conclusion that this gene is not BRCA1.
WB	Immunogen information
Reactivity:	Gene ID:
Mouse, Rat	1845
	Uniprot P51452
Antibody Information	
<b>Recommended dilutions:</b> WB 1:500 - 1:1000	<b>Synonyms:</b> DUSP3; VHR
Source:	
Rabbit	
	Immunogen: Recombinant fusion protein containing a sequence corresponding
<b>lsotype:</b> IgG	to amino acids 1-185 of human DUSP3 (NP_004081.1).
	Storage:
	Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%
<b>Purification:</b> Affinity purification	sodium azide, 50% glycerol, pH7.3.

Western blot analysis of extracts of various cell lines, using DUSP3 antibody (CAB12068) at 1:3000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 90s.
