## CAB12401

## **Product Information**

Product SKU:	CAB12401	Gene ID:	355	Size:	20uL, 100uL
Clone No:	-	Host Species:	Rabbit	<b>Reactivity</b> :	Human

## **Additional Information**

Observed MW:	40-50kDa	Conjugate:	Unconjugated
Calculated MW:	38kDa	lsotype:	lgG

## **Immunogen Information**

Background	The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor contains
	a death domain. It has been shown to play a central role in the physiological regulation of programmed
	cell death, and has been implicated in the pathogenesis of various malignancies and diseases of the
	immune system. The interaction of this receptor with its ligand allows the formation of a death-inducing
	signaling complex that includes Fas-associated death domain protein (FADD), caspase 8, and caspase
	10. The autoproteolytic processing of the caspases in the complex triggers a downstream caspase
	cascade, and leads to apoptosis. This receptor has been also shown to activate NF-kappaB, MAPK3/ERK1,
	and MAPK8/JNK, and is found to be involved in transducing the proliferating signals in normal diploid
	fibroblast and T cells. Several alternatively spliced transcript variants have been described, some of which
	are candidates for nonsense-mediated mRNA decay (NMD). The isoforms lacking the transmembrane
	domain may negatively regulate the apoptosis mediated by the full length isoform.
Recommended Dilution:	WB,1:500 - 1:1000 IF/ICC,1:50 - 1:100
Synonyms:	APT1; CD95; FAS1; APO-1; FASTM; ALPS1A; TNFRSF6; Fas
Purifcation Method:	Affinity purification
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 30-335 of human Fas
	(NP_000034.1).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
