CD3E Antigen Rabbit Polyclonal Antibody

Product Information

Product SKU: CAB12415 **Gene ID**: 916 **Size**: 20uL, 100uL

Clone No: - Host Species: Rabbit Reactivity: Human, Mouse, Rat

Additional Information

Observed MW: 23kDa **Conjugate:** Unconjugated

Calculated MW: 23kDa Isotype: IgG

Immunogen Information

Background: The protein encoded by this gene is the CD3-epsilon polypeptide, which together with CD3-gamma, -

delta and -zeta, and the T-cell receptor alpha/beta and gamma/delta heterodimers, forms the T-cell receptor-CD3 complex. This complex plays an important role in coupling antigen recognition to several intracellular signal-transduction pathways. The genes encoding the epsilon, gamma and delta polypeptides are located in the same cluster on chromosome 11. The epsilon polypeptide plays an essential role in T-cell development. Defects in this gene cause immunodeficiency. This gene has also

been linked to a susceptibility to type I diabetes in women.

Recommended Dilution: WB,1:500 - 1:1000 IHC-P,1:50 - 1:200 IF/ICC,1:50 - 1:200

Synonyms: T3E; TCRE; IMD18; CD3epsilon; CD3E Antigen

Purifcation Method: Affinity purification

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 111-207 of human CD3E

(NP_000724.1).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
