## **EPO Rabbit Polyclonal Antibody**

## CAB12435

| Product Information<br>Size:                      | Protein Background  |                |                       |
|---|---|----------------|-----------------------|
| Size:<br>20uL, 50uL, 100uL, 200uL<br>Observed MW: | This gene is a member of the EPO/TPO family and encodes a secreted, glycosylated cytokin composed of four alpha helical bundles. The protein is found in the plasma and regulates re cell production by promoting erythroid differentiation and initiating hemoglobin synthesis. Th protein also has neuroprotective activity against a variety of potential brain injuries an antiapoptotic functions in several tissue types. |                |                       |
|   |   | 38kDa          |                       |

| lgG   |   |                |                       |

**Purification:** Affinity purification

Western blot analysis of extracts of various cell lines, using EPO antibody (CAB12435) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 10s.
