## **MICA Rabbit Polyclonal Antibody**

## CAB12622

**Product Information** 

Size:

20uL, 50uL, 100uL, 200uL

**Observed MW:** 

50kDa

Calculated MW:

31kDa/42kDa

**Applications:** 

**WB IHC** 

Reactivity:

Human, Mouse

**Protein Background** 

This gene encodes the highly polymorphic major histocompatability complex class I chainrelated protein A. The protein product is expressed on the cell surface, although unlike canonical class I molecules it does not seem to associate with beta-2-microglobulin. It is a ligand for the NKG2-D type II integral membrane protein receptor. The protein functions as a stress-induced antigen that is broadly recognized by intestinal epithelial gamma delta T cells. Variations in this gene have been associated with susceptibility to psoriasis 1 and psoriatic arthritis, and the shedding of MICA-related antibodies and ligands is involved in the progression from monoclonal gammopathy of undetermined significance to multiple myeloma. Alternative splicing of this gene results in multiple transcript variants.

Immunogen information

Gene ID: 100507436

Uniprot Q29983

**Antibody Information** 

**Recommended dilutions:** 

WB 1:500 - 1:2000 IHC 1:50 - 1:200

Source:

Rabbit

Isotype:

IgG

Synonyms:

MICA; MIC-A; PERB11.1

Immunogen:

Recombinant fusion protein containing a sequence corresponding

to amino acids 24-307 of human MICA (NP\_000238.1).

Storage:

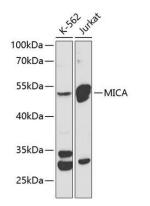

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%

sodium azide, 50% glycerol, pH7.3.

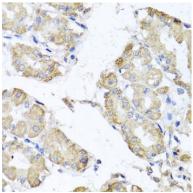

**Purification:** 

Affinity purification

## **Product Images**

Western blot analysis of extracts of various cell lines, using MICA Antibody (CAB12622) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST.

Immunohistochemistry of paraffin-embedded human stomach using MICA antibody (CAB12622) at dilution of 1:100 (40x lens).
