CAB13469

## Product Information Size:

20uL, 50uL, 100uL, 200uL
Observed MW:
21 kDa

## Calculated MW:

12kDa/13kDa/14kDa/15kDa/ 20kDa

## Applications:

## WB IF

## Reactivity:

Human, Mouse, Rat

## Antibody Information

## Recommended dilutions: <br> WB 1:500-1:2000 IF 1:50 1:200

Source:
Rabbit

Isotype:
IgG

## Protein Background

This gene encodes a member of the mammalian activation transcription factor/cAMP responsive element-binding (CREB) protein family of transcription factors. This gene is induced by a variety of signals, including many of those encountered by cancer cells, and is involved in the complex process of cellular stress response. Multiple transcript variants encoding different isoforms have been found for this gene. It is possible that alternative splicing of this gene may be physiologically important in the regulation of target genes.

## Immunogen information

Gene ID:
467

## Uniprot

P18847

## Synonyms:

ATF3

## Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 1-181 of human ATF3 (NP_001665.1).

## Storage:

Store at $-20^{\circ} \mathrm{C}$. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH7.3.

## Purification:

Affinity purification

Western blot analysis of extracts of various cell lines, using ATF3 antibody (CAB13469) at 1:1000 dilution. Raw264.7 cells were treated by LPS ( $1 \mathrm{ug} / \mathrm{mL}$ ) at 37'C for 8 hours. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3\% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 60s.

Immunofluorescence analysis of U-2 OS cells using ATF3 antibody (CAB13469) at dilution of 1:100. Blue: DAPI for nuclear staining.
