

CAB14091

Product Information

| | | | | | |
|---------------------|----------|----------------------|--------|--------------------|--------------|
| Product SKU: | CAB14091 | Gene ID: | 9495 | Size: | 20uL, 100uL |
| Clone No: | - | Host Species: | Rabbit | Reactivity: | Human, Mouse |

Additional Information

| | | | |
|-----------------------|-------|-------------------|--------------|
| Observed MW: | 47kDa | Conjugate: | Unconjugated |
| Calculated MW: | 47kDa | Isotype: | IgG |

Immunogen Information

| | |
|------------------------------|---|
| Background: | The A-kinase anchor proteins (AKAPs) are a group of structurally diverse proteins, which have the common function of binding to the regulatory subunit of protein kinase A (PKA) and confining the holoenzyme to discrete locations within the cell. This gene encodes a member of the AKAP family. The encoded protein binds to the RII-beta regulatory subunit of PKA, and also to protein kinase C and the phosphatase calcineurin. It is predominantly expressed in cerebral cortex and may anchor the PKA protein at postsynaptic densities (PSD) and be involved in the regulation of postsynaptic events. It is also expressed in T lymphocytes and may function to inhibit interleukin-2 transcription by disrupting calcineurin-dependent dephosphorylation of NFAT. |
| Recommended Dilution: | WB, 1:500 - 1:2000 |
| Synonyms: | H21; AKAP75; AKAP79; AKAP5 |
| Purification Method: | Affinity purification |
| Immunogen: | Recombinant fusion protein containing a sequence corresponding to amino acids 1-270 of human AKAP5 (NP_004848.3). |
| Storage: | Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH 7.3. |
