CAB1422

## Product Information Size:

50uL, 100uL, 200uL
Observed MW:
56kDa
Calculated MW:
55kDa
Applications:
WB IHC
Reactivity:
Human

## Antibody Information

## Recommended dilutions:

WB 1:500-1:2000 IHC 1:50

- 1:200

## Source:

Rabbit

## Isotype:

IgG

## Protein Background

Histamine is a ubiquitous messenger molecule released from mast cells, enterochromaffin-like cells, and neurons. Its various actions are mediated by histamine receptors $\mathrm{H} 1, \mathrm{H} 2, \mathrm{H} 3$ and H 4 . The protein encoded by this gene is an integral membrane protein and belongs to the $G$ protein-coupled receptor superfamily. It mediates the contraction of smooth muscles, the increase in capillary permeability due to contraction of terminal venules, the release of catecholamine from adrenal medulla, and neurotransmission in the central nervous system. It has been associated with multiple processes, including memory and learning, circadian rhythm, and thermoregulation. It is also known to contribute to the pathophysiology of allergic diseases such as atopic dermatitis, asthma, anaphylaxis and allergic rhinitis. Multiple alternatively spliced variants, encoding the same protein, have been identified.

## Immunogen information

## Gene ID:

3269

## Uniprot

P35367

## Synonyms:

HRH1; H1-R; H1R; HH1R; hisH1

## Immunogen:

Recombinant protein of human HRH1

## Storage:

Store at $-20^{\circ} \mathrm{C}$. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH7.3.

## Purification:

Affinity purification

Western blot analysis of extracts of Human normal colon tissue, using HRH1 antibody (CAB1422). Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABSO14) at 1:10000 dilution. Lysates/proteins: 25 ug per lane. Blocking buffer: $3 \%$ nonfat dry milk in TBST.
