CAB14735

## Product Information

## Size:

20uL, 50uL, 100uL, 200uL
Observed MW:

72 kDa

## Calculated MW:

$33 \mathrm{kDa} / 34 \mathrm{kDa} / 69 \mathrm{kDa} / 71 \mathrm{kDa}$

## Applications:

## WB

Reactivity:
Human, Mouse, Rat

## Antibody Information

Recommended dilutions:
WB 1:500-1:2000

## Source:

Rabbit

## Isotype:

IgG

## Protein Background

This gene encodes a member of the type I cytokine receptor family, which is a transmembrane receptor for growth hormone. Binding of growth hormone to the receptor leads to receptor dimerization and the activation of an intra- and intercellular signal transduction pathway leading to growth. Mutations in this gene have been associated with Laron syndrome, also known as the growth hormone insensitivity syndrome (GHIS), a disorder characterized by short stature. In humans and rabbits, but not rodents, growth hormone binding protein (GHBP) is generated by proteolytic cleavage of the extracellular ligand-binding domain from the mature growth hormone receptor protein. Multiple alternatively spliced transcript variants have been found for this gene.

## Immunogen information

## Gene ID:

2690

## Uniprot

P10912

## Synonyms:

GHR; GHBP; GHIP

## Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 26-260 of human GHR (NP_001229328.1).

## Storage:

Store at $-20^{\circ} \mathrm{C}$. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH 7.3 .

## Purification:

Affinity purification

Western blot analysis of extracts of various cell lines, using GHR antibody (CAB14735) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABSO14) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3\% nonfat dry milk in TBST. Detection: ECL Enhanced Kit (CABM00021). Exposure time: 30s.
