

PAEP Rabbit Polyclonal Antibody

CAB14757

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

Calculated MW:

9kDa/18kDa/20kDa

Applications:

IHC

Reactivity:

Human, Mouse, Rat

Antibody Information

Recommended dilutions:

IHC 1:50 - 1:200

Source:

Rabbit

Isotype:

IgG

Purification:

Affinity purification

Protein Background

This gene is a member of the kernel lipocalin superfamily whose members share relatively low sequence similarity but have highly conserved exon/intron structure and three-dimensional protein folding. Most lipocalins are clustered on the long arm of chromosome 9. The encoded glycoprotein has been previously referred to as pregnancy-associated endometrial alpha-2-globulin, placental protein 14, and glycodelin, but has been officially named progesterone-associated endometrial protein. Three distinct forms, with identical protein backbones but different glycosylation profiles, are found in amniotic fluid, follicular fluid and seminal plasma of the reproductive system. These glycoproteins have distinct and essential roles in regulating a uterine environment suitable for pregnancy and in the timing and occurrence of the appropriate sequence of events in the fertilization process. Alternative splicing results in multiple transcript variants.

Immunogen information

Gene ID:

5047

Uniprot

P09466

Synonyms:

PAEP; GD; GdA; GdF; GdS; PAEG; PEP; PP14

Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 19-180 of human PAEP (NP_002562.2).

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
