TYROBP Rabbit Polyclonal Antibody

CAB14794

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

12kDa

Calculated MW:

11kDa/12kDa

Applications:

.pp..cat

WB

Reactivity:

Mouse, Rat

Protein Background

This gene encodes a transmembrane signaling polypeptide which contains an immunoreceptor tyrosine-based activation motif (ITAM) in its cytoplasmic domain. The encoded protein may associate with the killer-cell inhibitory receptor (KIR) family of membrane glycoproteins and may act as an activating signal transduction element. This protein may bind zeta-chain (TCR) associated protein kinase 70kDa (ZAP-70) and spleen tyrosine kinase (SYK) and play a role in signal transduction, bone modeling, brain myelination, and inflammation. Mutations within this gene have been associated with polycystic lipomembranous osteodysplasia with sclerosing leukoencephalopathy (PLOSL), also known as Nasu-Hakola disease. Its putative receptor, triggering receptor expressed on myeloid cells 2 (TREM2), also causes PLOSL. Multiple alternative transcript variants encoding distinct isoforms have been identified for this gene.

Immunogen information

Gene ID: 7305

Uniprot

043914

Antibody Information

Recommended dilutions:

WB 1:500 - 1:2000

Synonyms:

TYROBP; DAP12; KARAP; PLOSL

Source:

Rabbit

Immunogen:

A synthetic peptide corresponding to a sequence within amino acids 50 to the C-terminus of human TYROBP (NP_003323.1).

Isotype:

lgG

Storage:

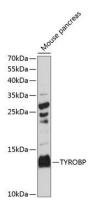

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%

sodium azide, 50% glycerol, pH7.3.

Purification:

Affinity purification

Product Images

Western blot analysis of extracts of mouse pancreas, using TYROBP antibody (CAB14794) at 1:3000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 90s.
