RECQL4 Rabbit Polyclonal Antibody

CAB14823

| Product Information | Protein Background | | |
|---|--|------------------|-----------------------|
| Size: 20uL, 50uL, 100uL, 200uL Observed MW: | The protein encoded by this gene is a DNA helicase that belongs to the RecQ helicase famil DNA helicases unwind double-stranded DNA into single-stranded DNAs and may modula chromosome segregation. This gene is predominantly expressed in thymus and test Mutations in this gene are associated with Rothmund-Thomson, RAPADILINO and Balle Gerold syndromes. | | |
