

CAB15141

---

## Product Information

### Size:

20uL, 50uL, 100uL, 200uL

### Observed MW:

### Calculated MW:

67kDa/82kDa

### Applications:

IF

### Reactivity:

Human

## Antibody Information

### Recommended dilutions:

IF 1:50 - 1:200

### Source:

Rabbit

### Isotype:

IgG

### Purification:

Affinity purification

## Protein Background

This gene encodes a member of the barr gene family and a regulatory subunit of the condensin complex. This complex is required for the conversion of interphase chromatin into condensed chromosomes. The protein encoded by this gene is associated with mitotic chromosomes, except during the early phase of chromosome condensation. During interphase, the protein has a distinct punctate nucleolar localization. Alternatively spliced transcript variants encoding different proteins have been described.

## Immunogen information

### Gene ID:

23397

### Uniprot

Q15003

### Synonyms:

NCAPH; BRRN1; CAP-H

### Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 1-250 of human NCAPH (NP\_056156.2).

### Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

## Product Images

---

Immunofluorescence analysis of U2OS cells using NCAPH antibody (CAB15141) at dilution of 1:100. Blue: DAPI for nuclear staining.
