Immunogen Information

Background: This gene encodes a novel E3 ubiquitin ligase that contains a RING finger domain in the N-terminus and three zinc-binding and one ubiquitin-interacting motif in the C-terminus. As a result of myristoylation, this protein associates with membranes and is primarily localized to intracellular membrane systems. The encoded protein may function as a positive regulator in the T-cell receptor signaling pathway.

Recommended Dilution: WB, 1:500 - 1:2000

Synonyms: TNORS; TRAC1; TRAC-1; RNF125

Purification Method: Affinity purification

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 1-105 of human RNF125 (NP_060301.2).
