

# ATXN2 Rabbit Polyclonal Antibody

CAB16666

## Product Information

### Size:

20uL, 50uL, 100uL, 200uL

### Observed MW:

170kDa

### Calculated MW:

27kDa/106kDa/109kDa/132kDa/140kDa

### Applications:

WB IHC IF

### Reactivity:

Human, Mouse, Rat

## Antibody Information

### Recommended dilutions:

WB 1:500 - 1:2000 IHC 1:50  
- 1:200 IF 1:50 - 1:200

### Source:

Rabbit

### Isotype:

IgG

### Purification:

Affinity purification

## Protein Background

This gene belongs to a group of genes that is associated with microsatellite-expansion diseases, a class of neurological and neuromuscular disorders caused by expansion of short stretches of repetitive DNA. The protein encoded by this gene has two globular domains near the N-terminus, one of which contains a clathrin-mediated trans-Golgi signal and an endoplasmic reticulum exit signal. The encoded cytoplasmic protein localizes to the endoplasmic reticulum and plasma membrane, is involved in endocytosis, and modulates mTOR signals, modifying ribosomal translation and mitochondrial function. The N-terminal region of the protein contains a polyglutamine tract of 14-31 residues that can be expanded in the pathogenic state to 32-200 residues. Intermediate length expansions of this tract increase susceptibility to amyotrophic lateral sclerosis, while long expansions of this tract result in spinocerebellar ataxia-2, an autosomal-dominantly inherited, neurodegenerative disorder. Genome-wide association studies indicate that loss-of-function mutations in this gene may be associated with susceptibility to type I diabetes, obesity and hypertension. Alternative splicing results in multiple transcript variants.

## Immunogen information

### Gene ID:

6311

### Uniprot

Q99700

### Synonyms:

ATXN2; ATX2; SCA2; TNRC13; ataxin-2

### Immunogen:

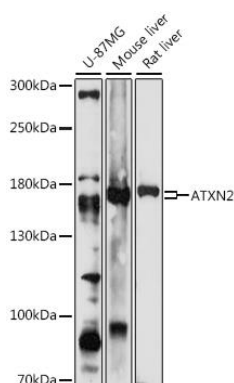

A synthetic peptide of human ATXN2

### Storage:

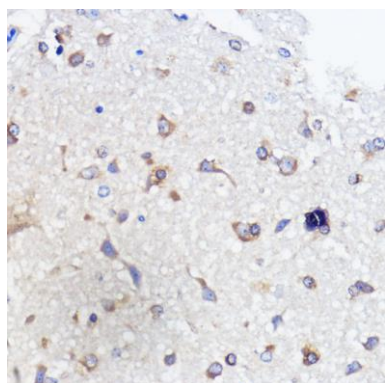

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

## Product Images

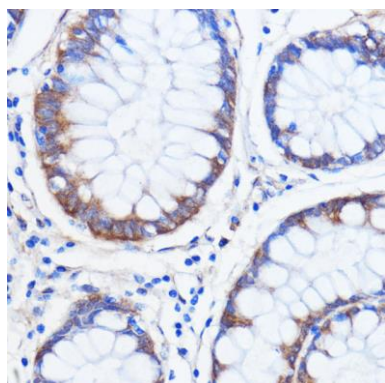

---

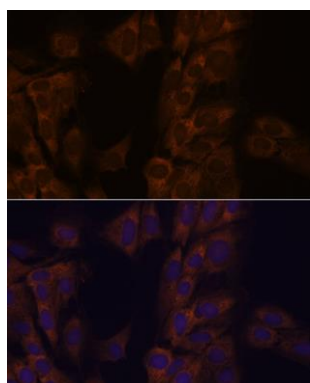

Western blot analysis of extracts of various cell lines, using ATXN2 antibody (CAB16666) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Enhanced Kit (CABM00021). Exposure time: 30s.

Immunohistochemistry of paraffin-embedded rat brain using ATXN2 antibody (CAB16666) at dilution of 1:100 (40x lens).

Immunohistochemistry of paraffin-embedded human colon carcinoma using ATXN2 antibody (CAB16666) at dilution of 1:100 (40x lens).

Immunofluorescence analysis of C6 cells using ATXN2 antibody (CAB16666) at dilution of 1:100. Blue: DAPI for nuclear staining.
