MICU1 Rabbit Polyclonal Antibody

CAB17613

Product Information Size:	Protein Background This gene encodes an essential regulator of mitochondrial Ca2+ uptake under basal conditions
20uL, 50uL, 100uL, 200uL	The encoded protein interacts with the mitochondrial calcium uniporter, a mitochondrial inner membrane Ca2+ channel, and is essential in preventing mitochondrial Ca2+ overload, which
Observed MW:	can cause excessive production of reactive oxygen species and cell stress. Alternatively spliced transcript variants encoding different isoforms have been described. [provided by RefSeq, Ma
