Immunogen Information

Background: This gene encodes a member of the Armadillo protein family, which function in adhesion between cells and signal transduction. Multiple translation initiation codons and alternative splicing result in many different isoforms being translated. Not all of the full-length natures of the described transcript variants have been determined. Read-through transcription also exists between this gene and the neighboring upstream thioredoxin-related transmembrane protein 2 (TMX2) gene.

Recommended Dilution: WB,1:500 - 1:2000

Synonyms: CAS; p120; BCDS2; CTNND; P120CAS; P120CTN; p120(CAS); p120(CTN); in

Purification Method: Affinity purification

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 573-832 of human δ-Catenin/p120 Catenin (NP_001078938.1).
