

CAB18103

Product Information

Product SKU:	CAB18103	Gene ID:	29126	Size:	20uL, 100uL
Clone No:	ARC5110-01	Host Species:	Rabbit	Reactivity:	Human

Additional Information

Observed MW:	40-50kDa	Conjugate:	Unconjugated
Calculated MW:	33kDa	Isotype:	IgG

Immunogen Information

Background:	This gene encodes an immune inhibitory receptor ligand that is expressed by hematopoietic and non-hematopoietic cells, such as T cells and B cells and various types of tumor cells. The encoded protein is a type I transmembrane protein that has immunoglobulin V-like and C-like domains. Interaction of this ligand with its receptor inhibits T-cell activation and cytokine production. During infection or inflammation of normal tissue, this interaction is important for preventing autoimmunity by maintaining homeostasis of the immune response. In tumor microenvironments, this interaction provides an immune escape for tumor cells through cytotoxic T-cell inactivation. Expression of this gene in tumor cells is considered to be prognostic in many types of human malignancies, including colon cancer and renal cell carcinoma. Alternative splicing results in multiple transcript variants.
Recommended Dilution:	WB,1:100 - 1:500 IHC-P,1:50 - 1:200
Synonyms:	B7-H; B7H1; PDL1; PD-L1; hPD-L1; PDCD1L1; PDCD1LG1; PD-L1/CD274
Purification Method:	Affinity purification
Immunogen:	Recombinant protein of human PD-L1 extracellular domain.
Storage:	Store at 4°C. Avoid freeze / thaw cycles. Tris Buffer, pH7.3-7.7, with 1% BSA and <0.1% Sodium azide.
