

PD-L1 Mouse Monoclonal Antibody

CAB18103

Product Information

Size:

50uL, 100uL, 200uL

Observed MW:

50kDa

Calculated MW:

20kDa/33kDa

Applications:

WB IHC

Reactivity:

Human

Antibody Information

Recommended dilutions:

WB 1:5000 - 1:10000 IHC

1:50 - 1:200

Source:

Mouse

Isotype:

IgG

Purification:

Affinity purification

Protein Background

This gene encodes an immune inhibitory receptor ligand that is expressed by hematopoietic and non-hematopoietic cells, such as T cells and B cells and various types of tumor cells. The encoded protein is a type I transmembrane protein that has immunoglobulin V-like and C-like domains. Interaction of this ligand with its receptor inhibits T-cell activation and cytokine production. During infection or inflammation of normal tissue, this interaction is important for preventing autoimmunity by maintaining homeostasis of the immune response. In tumor microenvironments, this interaction provides an immune escape for tumor cells through cytotoxic T-cell inactivation. Expression of this gene in tumor cells is considered to be prognostic in many types of human malignancies, including colon cancer and renal cell carcinoma. Alternative splicing results in multiple transcript variants.

Immunogen information

Gene ID:

29126

Uniprot

Q9NZQ7

Synonyms:

B7-H; B7H1; PDL1; PD-L1; PDCD1L1; PDCD1LG1; CD274

Immunogen:

Recombinant protein of human PD-L1 extracellular domain.

Storage:

Store at 4°C. Avoid freeze / thaw cycles. Tris Buffer, pH7.3-7.7, with 1% BSA and <0.1% Sodium azide.
