Chk2 Rabbit Monoclonal Antibody

Product Information

Product SKU: CAB19543 **Gene ID**: 11200 **Size**: 20uL, 100uL

Clone No: ARC57076 Host Species: Rabbit Reactivity: Human, Mouse

Additional Information

Observed MW: 65kDa **Conjugate:** Unconjugated

Calculated MW: 15-38kDa/50-65kDa Isotype: IgG

Immunogen Information

Background: In response to DNA damage and replication blocks, cell cycle progression is halted through the control

of critical cell cycle regulators. The protein encoded by this gene is a cell cycle checkpoint regulator and putative tumor suppressor. It contains a forkhead-associated protein interaction domain essential for activation in response to DNA damage and is rapidly phosphorylated in response to replication blocks and DNA damage. When activated, the encoded protein is known to inhibit CDC25C phosphatase, preventing entry into mitosis, and has been shown to stabilize the tumor suppressor protein p53, leading to cell cycle arrest in G1. In addition, this protein interacts with and phosphorylates BRCA1, allowing BRCA1 to restore survival after DNA damage. Mutations in this gene have been linked with Li-Fraumeni syndrome, a highly penetrant familial cancer phenotype usually associated with inherited mutations in TP53. Also, mutations in this gene are thought to confer a predisposition to sarcomas, breast cancer, and brain tumors. This nuclear protein is a member of the CDS1 subfamily of serine/threonine protein

kinases. Several transcript variants encoding different isoforms have been found for this gene.

Recommended Dilution: WB,1:2000 - 1:8000 IHC-P,1:100 - 1:500

Synonyms: CDS1; CHK2; LFS2; RAD53; hCds1; HuCds1; PP1425; Chk2

Purifcation Method: Affinity purification

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 1-100 of human Chk2 (O96017).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,0.05% BSA,50%

glycerol,pH7.3.
