Survivin Rabbit Monoclonal Antibody

CAB19663

Product Information	Protein Background
Size:	This gene is a member of the inhibitor of apoptosis (IAP) gene family, which encode negative
20uL, 50uL, 100uL, 200uL	regulatory proteins that prevent apoptotic cell death. IAP family members usually contain multiple baculovirus IAP repeat (BIR) domains, but this gene encodes proteins with only a single
Observed MW:	BIR domain. The encoded proteins also lack a C-terminus RING finger domain. Gene expression is high during fetal development and in most tumors, yet low in adult tissues. Alternatively
16KDa	spliced transcript variants encoding distinct isoforms have been found for this gene. [provided by RefSeq, Jun 2011]
