## **IDH1 Rabbit Polyclonal Antibody**

## **CAB2169**

Size:

**Product Information** 

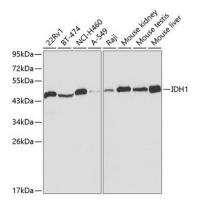

Isocitrate dehydrogenases catalyze the oxidative decarboxylation of isocitrate to 2oxoglutarate. These enzymes belong to two distinct subclasses, one of which utilizes NAD(+)

20uL, 50uL, 100uL, 200uL	oxoglutarate. These enzymes belong to two distinct subclasses, one of which utilizes NAD(+) as the electron acceptor and the other NADP(+). Five isocitrate dehydrogenases have been
Observed MW:	reported: three NAD(+)-dependent isocitrate dehydrogenases, which localize to the mitochondrial matrix, and two NADP(+)-dependent isocitrate dehydrogenases, one of which is
47kDa	mitochondrial and the other predominantly cytosolic. Each NADP(+)-dependent isozyme is a homodimer. The protein encoded by this gene is the NADP(+)-dependent isocitrate
Calculated MW:	dehydrogenase found in the cytoplasm and peroxisomes. It contains the PTS-1 peroxisomal
46kDa	targeting signal sequence. The presence of this enzyme in peroxisomes suggests roles in the regeneration of NADPH for intraperoxisomal reductions, such as the conversion of 2, 4-dienoyl-
Applications:	CoAs to 3-enoyl-CoAs, as well as in peroxisomal reactions that consume 2-oxoglutarate, namely the alpha-hydroxylation of phytanic acid. The cytoplasmic enzyme serves a significant
WB	role in cytoplasmic NADPH production. Alternatively spliced transcript variants encoding the same protein have been found for this gene.
Reactivity:	Immunogen information
Human, Mouse	-
	<b>Gene ID:</b> 3417
Antibody Information	Uniprot
Recommended dilutions: WB 1:500 - 1:2000	O75874
<b>Source:</b> Rabbit	<b>Synonyms:</b> IDH1; HEL-216; HEL-S-26; IDCD; IDH; IDP; IDPC; PICD
<b>lsotype:</b> lgG	<b>Immunogen:</b> Recombinant fusion protein containing a sequence corresponding to amino acids 1-414 of human IDH1 (NP_005887.2).
<b>Purification:</b> Affinity purification	Storage: Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%

sodium azide, 50% glycerol, pH7.3.

**Protein Background** 

Western blot analysis of extracts of various cell lines, using IDH1 antibody (CAB2169) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST.
