NPHS1 Rabbit Polyclonal Antibody

Product Information

Product SKU: CAB3048 **Gene ID**: 4868 **Size**: 20uL, 100uL

Clone No: - Host Species: Rabbit Reactivity: Mouse, Rat

Additional Information

Observed MW: 130kDa/180kDa **Conjugate:** Unconjugated

Calculated MW: 135kDa Isotype: IgG

Immunogen Information

Background: This gene encodes a member of the immunoglobulin family of cell adhesion molecules that functions

in the glomerular filtration barrier in the kidney. The gene is primarily expressed in renal tissues, and the protein is a type-1 transmembrane protein found at the slit diaphragm of glomerular podocytes. The slit diaphragm is thought to function as an ultrafilter to exclude albumin and other plasma macromolecules in the formation of urine. Mutations in this gene result in Finnish-type congenital

nephrosis 1, characterized by severe proteinuria and loss of the slit diaphragm and foot processes.

Recommended Dilution: WB,1:500 - 1:1000

Synonyms: CNF; NPHN; nephrin; NPHS1

Purifcation Method: Affinity purification

Immunogen: Recombinant fusion protein containing a sequence corresponding to amino acids 1019-1241 of human

NPHS1 (NP_004637.1).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.
