CAB3053

## Product Information

 Size:20uL, 50uL, 100uL, 200uL
Observed MW:

150 kDa
Calculated MW:
$69 \mathrm{kDa} / 119 \mathrm{kDa} / 130-150 \mathrm{kDa}$

## Applications:

WB
Reactivity:
Human, Mouse, Rat

## Antibody Information

## Recommended dilutions:

WB 1:500-1:2000

## Source:

Rabbit

## Isotype:

IgG

## Protein Background

This gene encodes an L1 family immunoglobulin cell adhesion molecule with multiple IGcam and fibronectin domains. The protein functions in neurite outgrowth, neurite fasciculation, and organization of the axon initial segment (AIS) and nodes of Ranvier on axons during early development. Both the AIS and nodes of Ranvier contain high densities of voltage-gated Na+ ( Nav ) channels which are clustered by interactions with cytoskeletal and scaffolding proteins including this protein, gliomedin, ankyrin 3 (ankyrin-G), and betalV spectrin. This protein links the AIS extracellular matrix to the intracellular cytoskeleton. This gene undergoes extensive alternative splicing, and the full-length nature of some variants has not been determined.

## Immunogen information

## Gene ID:

23114

## Uniprot

094856

## Synonyms:

NFASC; NF; NRCAML

## Immunogen:

Recombinant fusion protein containing a sequence corresponding to amino acids 830-1100 of human NFASC (NP_001005388.2).

## Storage:

Store at $-20^{\circ} \mathrm{C}$. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH 7.3 .

## Purification:

Affinity purification

Western blot analysis of extracts of various cell lines, using NFASC antibody (CAB3053) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABSO14) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3\% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 90s.
