DYNLL1 Rabbit Monoclonal Antibody

CAB4353

Product Information

Product SKU: CAB4353 **Gene ID**: 8655 **Size**: 20uL, 100uL

Clone No: ARC0975 Host Species: Rabbit Reactivity: Human, Mouse, Rat

Additional Information

Observed MW: 10kDa Conjugate: Unconjugated

Calculated MW: 10kDa Isotype: IgG

Immunogen Information

Background: Cytoplasmic dyneins are large enzyme complexes with a molecular mass of about 1,200 kD. They contain

two force-producing heads formed primarily from dynein heavy chains, and stalks linking the heads to a basal domain, which contains a varying number of accessory intermediate chains. The complex is involved in intracellular transport and motility. The protein described in this record is a light chain and exists as part of this complex but also physically interacts with and inhibits the activity of neuronal nitric oxide synthase. Binding of this protein destabilizes the neuronal nitric oxide synthase dimer, a conformation necessary for activity, and it may regulate numerous biologic processes through its effects

on nitric oxide synthase activity. Alternate transcriptional splice variants have been characterized.

Recommended Dilution: WB,1:500 - 1:2000 IHC-P,1:50 - 1:200

Synonyms: LC8; PIN; DLC1; DLC8; LC8a; DNCL1; hdlc1; DNCLC1; DYNLL1

Purifcation Method: Affinity purification

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 1-89 of human DYNLL1 (P63167).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,0.05% BSA,50%

glycerol,pH7.3.
