## **GNAS Rabbit Polyclonal Antibody**

## **Product Information**

**Product SKU**: CAB5546 **Gene ID**: 2778 **Size**: 20uL, 100uL

Clone No: - Host Species: Rabbit Reactivity: Human, Mouse, Rat

## **Additional Information**

**Observed MW**: 50kDa **Conjugate:** Unconjugated

Calculated MW: 28kDa/44kDa/45kDa/77kDa/10 Isotype: IgG

9kDa/111kDa

## Immunogen Information

**Background**: This locus has a highly complex imprinted expression pattern. It gives rise to maternally, paternally, and

biallelically expressed transcripts that are derived from four alternative promoters and 5' exons. Some transcripts contain a differentially methylated region (DMR) at their 5' exons, and this DMR is commonly found in imprinted genes and correlates with transcript expression. An antisense transcript is produced from an overlapping locus on the opposite strand. One of the transcripts produced from this locus, and

the antisense transcript, are paternally expressed noncoding RNAs, and may regulate imprinting in this region. In addition, one of the transcripts contains a second overlapping ORF, which encodes a structurally unrelated protein - Alex. Alternative splicing of downstream exons is also observed, which

results in different forms of the stimulatory G-protein alpha subunit, a key element of the classical signal transduction pathway linking receptor-ligand interactions with the activation of adenylyl cyclase and a

variety of cellular reponses. Multiple transcript variants encoding different isoforms have been found for this gene. Mutations in this gene result in pseudohypoparathyroidism type 1a,

pseudohypoparathyroidism type 1b, Albright hereditary osteodystrophy, pseudopseudohypoparathyroidism, McCune-Albright syndrome, progressive osseus heteroplasia,

polyostotic fibrous dysplasia of bone, and some pituitary tumors.

**Recommended Dilution**: WB,1:500 - 1:2000 IF/ICC,1:50 - 1:200 IP,0.5μg-4μg antibody for 400μg-600μg extracts of whole cells

Synonyms: AHO; GSA; GSP; POH; GPSA; NESP; SCG6; SgVI; GNAS1; PITA3; C20orf45; GNAS

**Purifcation Method**: Affinity purification

Immunogen: A synthetic peptide corresponding to a sequence within amino acids 1-100 of human GNAS

(NP 000507.1).

**Storage**: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.01% thimerosal,50% glycerol,pH7.3.
