DDX21 Rabbit Polyclonal Antibody

CAB6017

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

Calculated MW:

79kDa/87kDa

Applications:

WB

Reactivity:

Human

Antibody Information

Recommended dilutions:

WB 1:500 - 1:2000

Source:

Rabbit

Isotype:

IgG

Purification:Affinity purification

Protein Background

DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. This gene encodes a DEAD box protein, which is an antigen recognized by autoimmune antibodies from a patient with watermelon stomach disease. This protein unwinds double-stranded RNA, folds single-stranded RNA, and may play important roles in ribosomal RNA biogenesis, RNA editing, RNA transport, and general transcription.

Immunogen information

Gene ID: 9188

Uniprot Q9NR30

Synonyms:

DDX21; GUA; GURDB; RH-II/GU; RH-II/GuA

Immunogen:

Recombinant fusion protein containing a sequence corresponding

to amino acids 624-783 of human DDX21 (NP_004719.2).

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%

sodium azide, 50% glycerol, pH7.3.
