33kDa

CAB6041

Product Information

Product SKU:	CAB6041	Gene ID:	8106		Size:	20uL, 100uL	
Clone No:	-	Host Species:	Rabbit		Reactivity:	Human, Mouse	
Additional Information							
Observed MW:	45kDa		Conjugate:	Unconjugated	ł		

Isotype:

lgG

Immunogen Information

Calculated MW:

Background	This gene encodes an abundant nuclear protein that binds with high affinity to nascent poly(A) tails. The
	protein is required for progressive and efficient polymerization of poly(A) tails at the 3' ends of
	eukaryotic transcripts and controls the size of the poly(A) tail to about 250 nt. At steady-state, this
	protein is localized in the nucleus whereas a different poly(A) binding protein is localized in the
	cytoplasm. This gene contains a GCG trinucleotide repeat at the 5' end of the coding region, and
	expansion of this repeat from the normal 6 copies to 8-13 copies leads to autosomal dominant
	oculopharyngeal muscular dystrophy (OPMD) disease. Related pseudogenes have been identified on
	chromosomes 19 and X. Read-through transcription also exists between this gene and the neighboring
	upstream BCL2-like 2 (BCL2L2) gene.
Recommended Dilution:	WB,1:500 - 1:1000
Synonyms:	OPMD; PAB2; PABII; PABP2; PABP-2; PABPN1
Purifcation Method:	Affinity purification
Immunogen:	A synthetic peptide corresponding to a sequence within amino acids 1-100 of human PABPN1
	(NP_004634.1).
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
