RPS10 Rabbit Polyclonal Antibody

Product Information

CAB6056

Product SKU: CAB6056 Gene ID: 6204 20uL, 100uL Size:

Host Species: Clone No: Rabbit Reactivity: Human, Mouse, Rat

Additional Information

Observed MW: 19kDa Unconjugated Conjugate:

Calculated MW: 19kDa Isotype: IgG

Immunogen Information

Background: Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S

> subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 40S subunit. The protein belongs to the S10E family of ribosomal proteins. It is located in the cytoplasm. Variable expression of this gene in colorectal cancers compared to adjacent normal tissues has been observed, although no correlation between the level of expression and the severity of the disease has been found. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. Alternate splicing results in multiple transcript variants that encode the same protein. Naturally occurring read-through transcription occurs between this locus and the neighboring locus NUDT3 (nudix (nucleoside diphosphate linked moiety X)-type motif 3).

Recommended Dilution: WB,1:500 - 1:1000 IHC-P,1:20 - 1:200 IF/ICC,1:20 - 1:100

Synonyms: S10; DBA9; eS10; RPS10

Purification Method: Affinity purification

Recombinant fusion protein containing a sequence corresponding to amino acids 1-165 of human Immunogen:

RPS10 (NP_001190174.1).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
