KCND2 Rabbit Polyclonal Antibody

CAB6203

Product Information

Size:

20uL, 50uL, 100uL, 200uL

Observed MW:

82kDa

Calculated MW:

70kDa

Applications:

Reactivity:

Human, Rat

WB IHC

Antibody Information

Recommended dilutions:

WB 1:500 - 1:2000 IHC 1:50 - 1:200

Source:

Rabbit

Isotype:

IgG

Purification: Affinity purification **Protein Background**

Voltage-gated potassium (Kv) channels represent the most complex class of voltage-gated ion channels from both functional and structural standpoints. Their diverse functions include regulating neurotransmitter release, heart rate, insulin secretion, neuronal excitability, epithelial electrolyte transport, smooth muscle contraction, and cell volume. Four sequence-related potassium channel genes - shaker, shaw, shab, and shal - have been identified in Drosophila, and each has been shown to have human homolog(s). This gene encodes a member of the potassium channel, voltage-gated, shal-related subfamily, members of which form voltageactivated A-type potassium ion channels and are prominent in the repolarization phase of the action potential. This member mediates a rapidly inactivating, A-type outward potassium current which is not under the control of the N terminus as it is in Shaker channels.

Immunogen information

Gene ID:

3751

Uniprot Q9NZV8

Synonyms:

KCND2; KV4.2; RK5

Immunogen:

Recombinant fusion protein containing a sequence corresponding

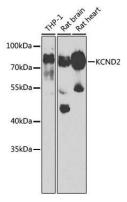

to amino acids 501-630 of human KCND2 (NP_036413.1).

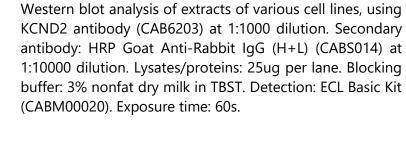

Storage:

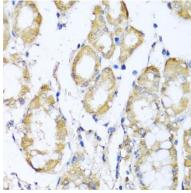

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%

sodium azide, 50% glycerol, pH7.3.

Product Images

Immunohistochemistry of paraffin-embedded human stomach using KCND2 antibody (CAB6203) at dilution of 1:100 (40x lens).
