CAB7082

## Product Information

Size:
20uL, 50uL, 100uL, 200uL
Observed MW:
$14-18 \mathrm{kDa}$

## Calculated MW:

15kDa/17kDa

## Applications:

## WB

## Reactivity:

Human

## Protein Background

This gene encodes a component of the iron-sulfur (Fe-S) cluster scaffold. Fe-S clusters are cofactors that play a role in the function of a diverse set of enzymes, including those that regulate metabolism, iron homeostasis, and oxidative stress response. Alternative splicing results in transcript variants encoding different protein isoforms that localize either to the cytosol or to the mitochondrion. Mutations in this gene have been found in patients with hereditary myopathy with lactic acidosis. A disease-associated mutation in an intron may activate a cryptic splice site, resulting in the production of a splice variant encoding a putatively non-functional protein. A pseudogene of this gene is present on chromosome 1.

## Immunogen information

## Gene ID:

23479

## Uniprot

Q9H1K1

## Synonyms:

ISCU; 2310020H20Rik; HML; ISU2; NIFU; NIFUN; hnifU

## Immunogen:

Source:
Rabbit

## Isotype:

IgG

Recombinant fusion protein containing a sequence corresponding to amino acids 1-167 of human ISCU (NP_998760.1).

## Storage:

Store at $-20^{\circ} \mathrm{C}$. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH 7.3 .

## Purification:

Affinity purification

Western blot analysis of extracts of various cell lines, using ISCU Antibody (CAB7082) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABSO14) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3\% nonfat dry milk in TBST. Detection: ECL Enhanced Kit (CABM00021). Exposure time: 10s.
