CAB7159

## Product Information <br> Size:

50uL, 100uL
Observed MW:
130 kDa
Calculated MW:
$76 \mathrm{kDa} / 126 \mathrm{kDa}$

## Applications:

WB IHC
Reactivity:
Human, Mouse, Rat

## Antibody Information

Recommended dilutions:
WB 1:500-1:2000 IHC 1:50 - 1:200

## Source:

Rabbit

## Isotype:

IgG

## Protein Background

The protein encoded by this gene is a putative serine/threonine kinase that localizes to the mitotic apparatus and complexes with cell cycle controller CDC2 kinase in early mitosis. The protein is phosphorylated in a cell-cycle dependent manner, with late prophase phosphorylation remaining through metaphase. The N -terminal region of the protein binds CDC2 to form a complex showing reduced H 1 histone kinase activity, indicating a role as a negative regulator of CDC2/cyclin A. In addition, the C-terminal kinase domain binds to its own N -terminal region, suggesting potential negative regulation through interference with complex formation via intramolecular binding. Biochemical and genetic data suggest a role as a tumor suppressor. This is supported by studies in knockout mice showing development of soft-tissue sarcomas, ovarian stromal cell tumors and a high sensitivity to carcinogenic treatments.

## Immunogen information

## Gene ID:

9113

## Uniprot

095835

## Synonyms:

LATS1; WARTS; wts

## Immunogen:

Recombinant protein of human LATS1

## Storage:

Store at $-20^{\circ} \mathrm{C}$. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH 7.3 .

## Purification:

Affinity purification

Western blot analysis of extracts of K-562 cells, using LATS1 antibody (CAB7159). Secondary antibody: HRP Goat AntiRabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25 ug per lane. Blocking buffer: $3 \%$ nonfat dry milk in TBST.
