## CAB7456

## **Product Information**

Product SKU:	CAB7456	Gene ID:	8839		Size:	20uL, 100uL		
Clone No:	-	Host Species:	Rabbit		Reactivity:	Human, Mouse, Rat		
Additional Information								
Observed MW:	27KD		Conjugate:	Unconjugate	d			
Calculated MW	: 27kDa		lsotype:	lgG				

## **Immunogen Information**

Background:	This gene encodes a member of the WNT1 inducible signaling pathway (WISP) protein subfamily, which			
-	belongs to the connective tissue growth factor (CTGF) family. WNT1 is a member of a family of cysteine-			
	rich, glycosylated signaling proteins that mediate diverse developmental processes. The CTGF family			
	members are characterized by four conserved cysteine-rich domains: insulin-like growth factor-binding			
	domain, von Willebrand factor type C module, thrombospondin domain and C-terminal cystine knot-			
	like (CT) domain. The encoded protein lacks the CT domain which is implicated in dimerization			
	heparin binding. It is 72% identical to the mouse protein at the amino acid level. This gene may be			
	downstream in the WNT1 signaling pathway that is relevant to malignant transformation. Its expression			
	in colon tumors is reduced while the other two WISP members are overexpressed in colon tumors. It is			
	expressed at high levels in bone tissue, and may play an important role in modulating bone turnover.			
<b>Recommended Dilution</b> :	WB,1:100 - 1:500 IHC-P,1:50 - 1:200 IF/ICC,1:50 - 1:200			
Synonyms:	CT58; WISP2; CTGF-L			
Purifcation Method:	Affinity purification			
Immunogen:	Recombinant fusion protein containing a sequence corresponding to amino acids 164-250 of human			
	WISP2 (NP_003872.1).			
Storage:	Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.09% Sodium azide,50% glycerol,pH7.3.
