## **APITD1 Rabbit Polyclonal Antibody**

## **CAB8293**

**Product Information** 

Size:

20uL, 50uL, 100uL, 200uL

**Observed MW:** 

16kDa

**Calculated MW:** 

9kDa/15kDa/19kDa

**Applications:** 

WB

Reactivity:

Human

Antibody Information

**Recommended dilutions:** 

WB 1:500 - 1:2000

**Source:** Rabbit

Isotype:

IgG

Purification:

Affinity purification

**Protein Background** 

This gene was identified in the neuroblastoma tumor suppressor candidate region on chromosome 1p36. It contains a TFIID-31 domain, similar to that found in TATA box-binding protein-associated factor, TAF(II)31, which is required for p53-mediated transcription activation. This gene was expressed at very low levels in neuroblastoma tumors, and was shown to reduce cell growth in neuroblastoma cells, suggesting that it may have a role in a cell death pathway. The protein is a component of multiple complexes, including the Fanconi anemia (FA) core complex, the APITD1/CENPS complex, and the CENPA-CAD (nucleosome distal) complex. Known functions include an involvement with chromatin associations of the FA core complex, and a role in the stable assembly of the outer kinetochore. Alternative splicing of this gene results in multiple transcript variants. Naturally occurring read-through transcripts also exist between this gene and the downstream cortistatin (CORT) gene, as represented in GenelD:100526739. An APITD1-related pseudogene has been identified on chromosome 7.

Immunogen information

Gene ID:

378708

Uniprot

Q8N2Z9

Synonyms:

CENPS; APITD1; CENP-S; FAAP16; MHF1

Immunogen:

Recombinant fusion protein containing a sequence corresponding

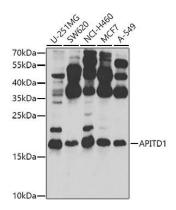

to amino acids 1-138 of human APITD1 (NP\_954988.1).

Storage:

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02%

sodium azide, 50% glycerol, pH7.3.

## **Product Images**

Western blot analysis of extracts of various cell lines, using APITD1 antibody (CAB8293) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 30s.
