## HLA-E Rabbit Polyclonal Antibody

## CAB8429

| roduct Information            | Protein Background  |
|-------------------------------|---|
| Size:                         | HLA-E belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodime  |
| 20uL, 50uL, 100uL, 200uL      | consisting of a heavy chain and a light chain (beta-2 microglobulin). The heavy chain i<br>anchored in the membrane. HLA-E binds a restricted subset of peptides derived from the leade |
| Observed MW:                  | peptides of other class I molecules. The heavy chain is approximately 45 kDa and its gen contains 8 exons. Exon one encodes the leader peptide, exons 2 and 3 encode the alpha1 an      |
| 45kDa                         | alpha2 domains, which both bind the peptide, exon 4 encodes the alpha3 domain, exon encodes the transmembrane region, and exons 6 and 7 encode the cytoplasmic tail.                    |
| Calculated MW:                |   |

|                               | Storage:  |
| <b>lsotype:</b><br>lgG        | Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.   |
| .90                           |   |

**Purification:** Affinity purification

Western blot analysis of extracts of various cell lines, using HLA-E antibody (CAB8429) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (CABS014) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (CABM00020). Exposure time: 90s.
