# MHC class I (HLA-A/B) Rabbit Monoclonal Antibody

## **CAB8754**

## **Product Information**

**Product SKU**: CAB8754 **Gene ID**: 3105/3106 **Size**: 20uL, 100uL

Clone No: ARC1291 Host Species: Rabbit Reactivity: Human

## **Additional Information**

**Observed MW**: 44kDa **Conjugate:** Unconjugated

Calculated MW: 41kDa Isotype: IgG

# Immunogen Information

**Background**: HLA-A belongs to the HLA class I heavy chain paralogues. This class I molecule is a heterodimer

consisting of a heavy chain and a light chain (beta-2 microglobulin). The heavy chain is anchored in the membrane. Class I molecules play a central role in the immune system by presenting peptides derived from the endoplasmic reticulum lumen. They are expressed in nearly all cells. The heavy chain is approximately 45 kDa and its gene contains 8 exons. Exon 1 encodes the leader peptide, exons 2 and 3 encode the alpha1 and alpha2 domains, which both bind the peptide, exon 4 encodes the alpha3 domain, exon 5 encodes the transmembrane region, and exons 6 and 7 encode the cytoplasmic tail. Polymorphisms within exon 2 and exon 3 are responsible for the peptide binding specificity of each class one molecule. Typing for these polymorphisms is routinely done for bone marrow and kidney transplantation. Hundreds of HLA-A alleles have been described. [provided by RefSeq, Jul 2008]

**Recommended Dilution**: WB,1:500 - 1:2000 IF/ICC,1:50 - 1:200

**Synonyms**: HLAA; MHC class I (HLA-A/B)

**Purifcation Method**: Affinity purification

**Immunogen**: A synthetic peptide corresponding to a sequence within amino acids 200-300 of human MHC class I

(HLA-A/B) (P04439).

Storage: Store at -20°C. Avoid freeze / thaw cycles.Buffer: PBS with 0.02% sodium azide,0.05% BSA,50%

glycerol,pH7.3.
